The International Network for Universities of the Third Age

This website was set up in December 1997 by a group of U3A computer enthusiasts with the purpose of encouraging the use of the Internet for more effective communications and learning for U3A members in the UK.

Our 'subject network' aims to establish internet projects for our international contacts and to provide educational resources as part of a worldwide movement.

Our very successful project - 'My U3A' - for U3A/UTA members around the world, is still growing - why not tell us about YOUR group? Click on the links on the right to see examples.....

Here are the headings;

The University of the Third Age Nigeria

Welcome!

U3A Nigeria is Multi-generational, promoting intergenerational programmes for the re-engagement of older persons who are transferring their dying vocations to the younger generation to occupy them for better productive engagements and reduction of poverty in both generations.

This is one of U3A Nigeria's contributions to the Millennium Development goals (MDGs). Our youth also transfer their new technologies to the older persons for them to be properly trained for re-engagements.

Groups

We are also for Retraining of Teachers in co-operation with Colleges of Education, Universities and Teacher Agencies.
